HANNA TAYLOR

WEB DEVELOPER

OBJECTIVE

To continue a life-long journey of learning while contributing my knowledge and skills to a team that is passionate about their product.

PROJECTS

LOCALEYES, localeyestrips.com

Localeyes is an app that connects tourists to day trips curated by locals. Localeyes is built in Rails and utilizes the Google Maps and Google Places API. I worked a lot on front end, implementing Materialize CSS, a framework based on Google's Material Design philosophy. In addition to front end, I created other features on the back end, such as favorites, "been there", "available for tours", and mutual followers.

POTLUCKR

Web application built in Rails to facilitate Potluck event planning where users can host a potluck, and invited users can mark themselves as attending and sign up for items to bring. Built in a weekend as a fun side project to teach myself Rails as well as Bootstrap.

LAUTERBRUNNEN VALLEY MUSIC FESTIVAL, goo.gl/hl9ffE

A mock music festival website I built to display my web design, graphic design, and front-end skills. HTML/CSS was hard-coded without the use of a theme or even a CSS framework.

EXPERIENCE

HTML/CSS WEB DESIGNER, B12   2016

Read and interpreted client briefs to then design and build an elegant and responsive web presence for the client, custom to their needs.

STORE MANAGER, Edible Arrangements   2013-2016

Lead the store staff and was solely responsible for overall operations, guest experience, and sales performance. Oversaw employee recruitment, hiring, and training to ensure quality of store staff in order to have an efficiently running store. Forecasted sales for busy holidays to ensure that we had adequate temporary labor and inventory to deal with the very high demand.

OWNER/CO-FOUNDER, Lace And Burlap   2012

Established a legitimate retail business. Developed a fully functioning e-commerce website in just a few days with no prior web development experience. Established the brand by creating the logo, social media presence, and all of the graphic design. Other responsibilities included management, marketing, accounting, and sales. Generated a profit of approximately 75% of revenue in just 5 days of opening.

EDUCATION

DEV BOOTCAMP

A 19 week intensive curriculum covering Ruby, JavaScript, Ruby on Rails, React.js, SQL, Git, HTML and CSS. The progressive learning environment also places emphasis on pair programming, team skills, empathy, and TDD.

UNIVERSITY OF VALLEY FORGE

Major: B.S., Business Administration   **Minor:** Counseling
Awards: Outstanding Graduate, "Who's Who   **Honors:** Magna Cum Laude
Among Students in American Colleges and
Universities" Award, Scholar Athlete.
